learning Platform

VET CURRICULUM FOR PHLEBOLOGISTS

The TRAPP Curriculum in Phlebology provides doctors with practical skills in order to offer better services to the community. The European Network created by the project defined the basic common phlebology criteria in Europe.

The Training Course

Includes modules in: basic phlebological science, venous pathology, non-invasive imaging, sclerotherapy, compression therapy, surgical treatments in phlebology, thermal ablation, glue obliteration, invasive treatments for venous stenosis or thrombosis, treatment of venous ulcer, treatment of lymphedema, drug treatments and miscellaneous.

For more information and details please consult the project website www.europeanregisterphlebologists.eu
